

MyChart - On Your Mobile Device

MyChart Mobile can be used to view health information. You can also send messages, schedule appointments, request medication refills and pay your medical bills.

To download the MyChart App:

1. Go to the **App Store** for Apple smartphones or the **Google Play Store** for Android smartphones
2. Search for MyChart
3. Once downloaded, search for **Baptist OneCare**
4. Use your same MyChart login information to access MyChart Mobile

The following features are available in the MyChart Mobile App:

Test Results

- View test results and standard ranges for each result. Please note: The ability to view or graph previous test results is not available on the mobile app.

Messages

- Send messages to your health care providers
 - Using the Inbox, you can view, delete and reply to messages

Appointments

- View upcoming appointments
- Confirm, cancel and schedule appointments
- View clinic information, such as the phone number and location
- View the "After Visit Summary" for past appointments

Medications

- View list of medications, dosing instructions and remaining refills
- Request medication refills.

Health Reminders

- View preventive care reminders

Health Summary

- View the following items in the "Health Summary":
 - Allergies
 - Immunizations
 - Current diagnoses

Billing

- View current account balances
- Sign up for paperless billing
- Make payments

Request Access

- Request access to a family member's medical record

Track My Health

- Record health data in flow sheets and view the progress in a graph
